RIBIČ'S STORY

The restaurant Ribič brings gastronomic delicacies to you in a house, which was first mentioned in year 1291. Then there was a bakery in this square at the old wooden bridge over the river Drava. Nearby there was a tollbooth, a weighing house and an old civil hospital. There was a place, which welcomed every visitor of the town and offered a welcome greeting to the medieval Ptuj. In the building there is a more than 200 year old lively tradition of bakery trade and there was also established a restaurant, which was called "at Stefan's" and was a restaurant for log drivers, tanners and everyone with prestige in town.

On 23rd May 1985 the restaurant "Ribič" was established, in the year 2016 the leadership was taken with pride by the restaurant Pan, which is going to lead the restaurant Ribič to the future.
